EXPORT TO CSV

lineup/getavailableplayerscsv?contestTypeId=5&draftGroupId=13402

After you have exported the lineup for the contest you have selected, you can upload it to the site to generate a lineup. If you have not uploaded a file and try to run the program, it'll give you a popup telling you to complete the form.

# Generate Lineup

Choose File No file chosen

cre  Please select a file.

Work Project

# Generate Lineup

Choose File DKSalaries (14).csv

create lineup

No file chosen

After a file has been chosen, you should be able to create a lineup. While it generates a lineup a popup with a loading bar should show you that it is currently running.

# Generate Lineup

Choose File RubricForNextWeek (5).pdf

create lineup

generating optimal lineup

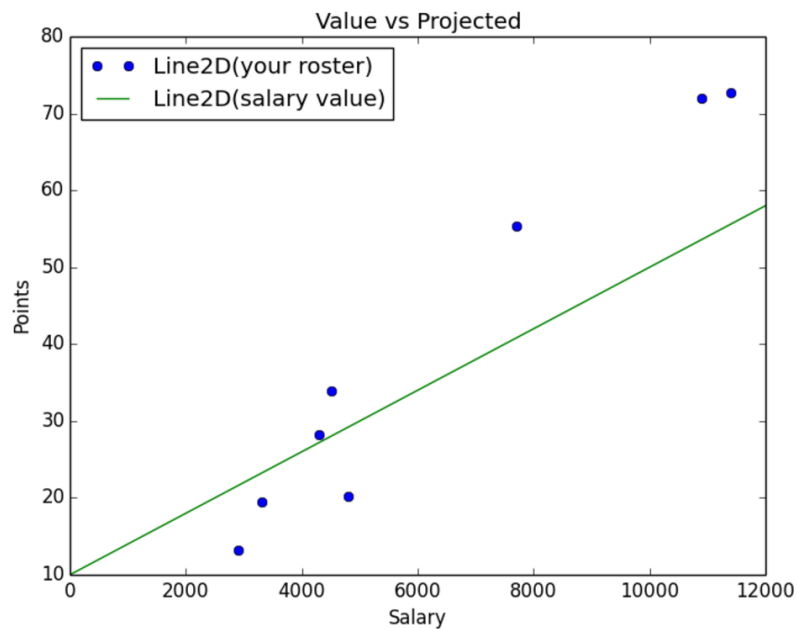

After it is done running, the results with a nice graph to visualize your players should show up.

## Generate Lineup

Choose File RubricForNex...eek (5).pdf

create lineup

Position	Name	Salary	Team	Projected
C	Pau Gasol	4300	SA	28.25
G	Deron Williams	2900	CLE	13.245
F	Trevor Ariza	4800	HOU	20.275
UTIL	Clint Capela	4500	HOU	33.89
PF	Channing Frye	3300	CLE	19.535
PG	Kyrie Irving	7700	CLE	55.355
SG	James Harden	10900	HOU	71.935
SF	LeBron James	11400	CLE	72.69
Totals		49800		315.175

This graph should be accurate to the predictions that popup in the table, from here you can select your players in DraftKings and see how they do.
